CLAIM AMENDMENTS

1-16. (Canceled)

17. (Currently amended) A wood-based decorative article comprising: a veneer formed by slicing wood and being light permeable; and

a substrate formed of a transparent synthetic resin and joined to a rear surface of said veneer, said substrate having rigidity and a larger thickness than that of said veneer;

wherein a transparent reinforcing member for reinforcing said veneer is interposed between said veneer and said substrate; and

an adhesive by which the reinforcing member is bonded to the veneer.

- 18. (Original) A wood-based decorative article according to claim 17, wherein at least one of said veneer and said reinforcing member is impregnated with a transparent synthetic resin.
- 19. (Previously presented) A wood-based decorative article according to claim 17, wherein a design layer for increasing variation of a design of said veneer is arranged on at least one of front and rear surfaces of said substrate.
- 20. (Original) A wood-based decorative article according to claim 19, wherein said design layer is removably attached to said rear surface of said substrate.

- 21. (Previously presented) A wood-based decorative article according to claim 17, wherein a light source for illumination is provided on a rear surface side of said substrate.
- 22. (Original) A wood-based decorative article according to claim 21, wherein at least one of a color and an amount of light emitted from said light source is variable.
- 23. (Original) A wood-based decorative article according to claim 21, wherein a light guide plate for making uniform said light from said light source is interposed between said light source and said substrate.
- 24. (Original) A wood-based decorative article according to claim 21, wherein a display member for displaying predetermined information is provided on a front surface of said veneer.
- 25. (Previously presented) A wood-based decorative article according to claim 17, wherein an indicator for giving a predetermined indication by using at least one of a liquid crystal device and an LED device is provided on a rear surface side of said substrate.
- 26. (Previously presented) A wood-based decorative article according to claim 17, wherein part of said substrate is formed of an opaque synthetic resin.

27. (Previously presented) A wood-based decorative article according to claim 17, wherein a topcoat is applied to a front surface of said veneer.

28. (Canceled)
